

Fast and convenient way to setup production order locations

ABOUT BizConPro Ltd.:

We have extensive experience in various production branches, and with Microsoft Dynamics 365 Business Central/NAV implementations in production companies. This makes it possible for us to bring you manufacturing module add-ons that make your job easier, automate processes and save your time.

The screenshot shows the 'PO Locations' page in Dynamics 365 Business Central. The page has a search bar, '+ New', 'Edit List', and 'Delete' buttons. Below the buttons is a table with the following data:

Output Location Code ↑	Item Category Code ↑	Default Location Code	Output Location ↑	Default Bin Code
	CHAIR	NORTH	<input checked="" type="checkbox"/>	
	DESK	EAST	<input checked="" type="checkbox"/>	
	PARTS	MAIN	<input type="checkbox"/>	
	MATERIAL	MAIN	<input type="checkbox"/>	
	BOX	PACKAGING	<input type="checkbox"/>	A001
→ NORTH	⋮	PARTS	EAST	<input type="checkbox"/>

WHAT THIS ADD-ON OFFERS

With this add-on, you can setup locations and location bins used on production orders using item categories. This means less setup and maintenance.

Locations on production order lines and production order components are filled automatically when production order is created.

Convenient way to check production orders location setup: a single page has everything you need.

Choose different component locations depending on location used on production order line.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way.

Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
